# Modifikasi Data

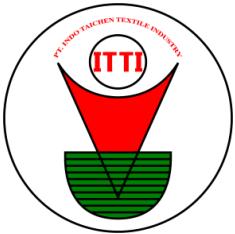

Modifikasi detail data resep

The screenshot illustrates the workflow for modifying prescription data (Resep) in a software application. The process involves several steps:

- Modifikasi Data (Modification Data):** This is the starting point, indicated by a red box around the menu item in the sidebar.
- Arsip resep (Prescription Archiving):** A step shown with a red box, likely indicating the final step where modified prescriptions are stored.
- Menambahkan order (Adding Order):** A step shown with a red box, likely indicating the creation of a new prescription record.
- Edit detail resep (Edit Prescription Detail):** A step shown with a red box, indicating the modification of existing prescription details.

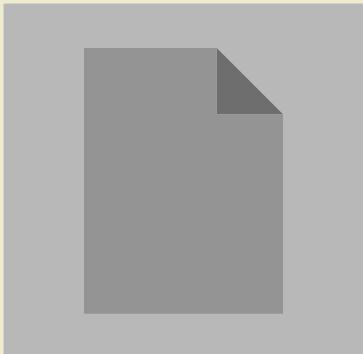

The main interface shows a grid of prescription records with columns including Rcode, No.Order, Langganan, Warna, and various tracking numbers and dates.
